Kees Versteegh (Nijmegen)	

## AIM AND SCOPE

*Historiographia Linguistica* (HL) serves the ever growing community of scholars interested in the history of the sciences concerned with language such as linguistics, anthropology, philosophy, psychology, neurology, and other disciplines.

Central objectives of HL are the critical presentation of the origin and development of particular ideas, concepts, schools of thought or trends, and the discussion of the methodological and philosophical foundations of a historiography of the language sciences, including the treatment of the relationship between this field of study and the history and philosophy of science in general.

HL is published in 3 issues per year of about 450 pages altogether. Each issue contains at least three major articles, one review article and/or a bibliography devoted to a particular topic, and many reviews and review notes as well as information on recent activities in the field.
